

Adult\_Positive-proximal\_1000bp\_bg\_all\_GO\_BP

tubule metanephric nephron involved epithelial kidney cell  
**development** morphogenesis regulation

differentiation fate eye embryonic organ cameratype specification  
**development** morphogenesis cell

compound cellular transcription rna organic nitrogen  
**process** biosynthetic regulation metabolic

peroxide hydrogen retinoic  
**response** cellular stimulus acid species reactive oxygen

erythrocyte eosinophil  
**differentiation** regulation positive megakaryocyte macrophage

maintenance positive segregation mitotic  
**regulation** sister chromatid cohesion
