

Adult\_Positive-proximal\_1000bp\_GO\_BP

cell differentiation metanephric involved tubule formation positive  
development regulation morphogenesis

negative positive compound cellular transcription rna  
regulation process metabolic biosynthetic

organization assembly segregation mitotic maintenance  
regulation positive sister chromatid cohesion

peroxide hydrogen acid  
response cellular stimulus monosaccharide hexose glucose retinoic

immunity secretory regulated pathway  
regulation positive mast cell leukocyte degranulation
