

PND15_Adult-exonic_bg_all_GO_BP

compound cellular processing histone

process metabolic catabolic regulation biosynthetic acid

involved positive differentiation process cell skeletal

regulation muscle development production

negative secretion transmembrane calcium vesicle establishment

transport regulation ion localization

fusion organelle structure complex component cellular

organization regulation assembly negative

positive light immune interferongammamediated innate

response regulation stimulus defense detection

action synaptic plasticity neuronal cellular

regulation potential membrane homeostasis ion

purinecontaining compound calcium

response cellular pathway signaling regulation ion metal

stimulus coupling communication cell abiotic detection

signaling pathway receptor protein coupled

chemical proliferation granule cerebellar

cell transmission synaptic signaling precursor involved

Similarity
