

PND15_Adult-exonic_bg_all_GO_BP

transmembrane cellular calcium vesicle localization metabolic
transport regulation ion process

assembly fusion negative actin metabolic filament acid
regulation organization process

glutamate cellular histidine amino
process catabolic acid metabolic damino tetrahydrofolate

activation positive interferongammamediated innate immune
response regulation signaling pathway defense

levels depolarization synaptic plasticity
regulation potential membrane action neuronal

muscle contraction skeletal regulation system process adaptation

fiber differentiation striated positive myotube
muscle development regulation cell skeletal
