

not_detected-no_ChIP_rna_proximal.inactive.accUp_GO_BP

metanephric involved kidney differentiation nephron tubule cell
development morphogenesis regulation

embryonic
differentiation spinal cord eye fate specification
development cell morphogenesis

cell cysteinetype proliferation endopeptidase
regulation positive process negative metabolic activity

differentiation alphabeta positive thymus immature activation
cell regulation negative proliferation

monosaccharide hexose glucose acid
response cellular stimulus carbohydrate peroxide hydrogen

mitotic division segregation chromosome maintenance
regulation sister chromatid positive cohesion
