

The diagram illustrates the evolution of a protein structure over time, showing the progression from a simple structure to a complex one with multiple domains and interactions. The structure is represented by a series of colored blocks (red, blue, black, green) connected by arrows, indicating the sequence of events. The diagram is divided into two main sections: a top section showing the initial evolution and a bottom section showing the final, more complex structure. The top section shows a simple structure with a few domains, while the bottom section shows a complex structure with many domains and interactions. The diagram is labeled 'Coding' on the right side.
