

with_ChIP_bg_all_proximal.inactive.accUp.H3K4me3_GO_BP

metanephric cell tubule involved kidney nephron metanephros
development morphogenesis regulation

specification formation
eye fate differentiation commitment cameratype
morphogenesis development cell

differentiation alphabeta positive thymus immature activation
regulation cell negative proliferation

cysteinetype peptidase proteolysis process involved apoptotic
regulation activity negative endopeptidase

peroxide hydrogen
response cellular stimulus retinoic acid hexose glucose
