

The figure displays genomic tracks for the 1000 Genomes Project, showing coding and non-coding regions across the genome. The tracks are organized into two main sections: Coding and Non-coding. The Coding section includes tracks for Coding, Donor, and Non-coding regions. The Non-coding section includes tracks for Non-coding and Donor regions. The tracks are color-coded: Coding (orange), Donor (green), and Non-coding (blue/pink). The tracks are arranged in a grid, with the top row showing Coding and Donor regions, and the bottom row showing Non-coding and Donor regions. The tracks are labeled with their respective categories: Coding, Donor, and Non-coding. The tracks are arranged in a grid, with the top row showing Coding and Donor regions, and the bottom row showing Non-coding and Donor regions. The tracks are labeled with their respective categories: Coding, Donor, and Non-coding.
