

Adult\_Positive-proximal\_1000bp\_GO\_BP

metanephric involved tubule epithelial kidney cell nephron  
**development** regulation morphogenesis

morphogenesis embryonic eye cameratype positive fate  
**development** differentiation regulation cell

negative compound cellular positive transcription rna  
**regulation** process metabolic biosynthetic

peroxide hydrogen acid  
**response** cellular stimulus monosaccharide hexose glucose retinoic

segregation mitotic maintenance chromosome  
**regulation** sister positive chromatid cohesion

pathway mast cell leukocyte engulfment  
**regulation** positive degranulation phagocytosis regulated

morphogenesis structural organization  
**nerve** optic vestibulocochlear formation development cranial

leukocyte immunity eosinophil  
**regulation** differentiation positive cell activation myeloid mediated
