

PND15_Adult-intronic_bg_all_GO_MF

transferase hydrolase receptor
activity kinase phosphatase oxidoreductase ligase dehydrogenase acting

voltagegated ion sodium cation potassium calcium
activity channel transporter transmembrane

ribonucleoside
binding sulfate ribonucleotide purine nucleotide ion nucleoside adenylyl metal

binding activity growth scaffold kinase dynein chain transcription light adhesion

activator inhibitor receptor enzyme
activity regulator channel guanylnucleotide exchange kinase

beta glutamate tyrosine metabotropic
binding receptor chemokine proteincoupled transforming growth

beta gaba proteincoupled
activity receptor hormone signaling growth mediator cytoplasmic

tract
binding dna rna bending junction fourway sequencespecific region aurich

binding gtpase kinase polymerase ubiquitin ligase enzyme

binding alphaactinin microtubule myosin actin

binding

domain binding
