

PND15_Adult-exonic_bg_all_GO_BP

involved production cell morphogenesis skeletal differentiation
regulation muscle development positive

processing regulation compound
process metabolic catabolic acid biosynthetic dna cellular

negative secretion transmembrane calcium vesicle establishment
transport regulation ion localization

stimulus defense receptor positive detection
response signaling regulation pathway cellular

component cellular structure complex positive fusion
organization regulation assembly negative

action synaptic plasticity neuronal cellular
regulation potential membrane homeostasis ion

fermentation
regulation process positive metabolic collagen negative

precursor coupling
cell transmission synaptic signaling communication chemical
